

SAFE-T-LOCK™

**Programmable
Code Switch
Prevents
Unauthorized
use of
Industrial Vehicles.**

L1000

- Allows plant & facility managers to input up to 99 different users/drivers to track vehicle usage. if an accident occurs or the vehicle is damaged the manager can easily identify the last operator.
- Allows each user to select a 4 to 8 digit personal access code & has a separate supervisor user menu for programming the unit.
- Voltage range from 9 to 120 volts Dc.
- Two internal LEDs indicate operational status - red indicates an error or lock mode & green indicates key press or touch is active.
